- Leukemia/stem cell transplants
- Colorectal cancer (including liver metastases and hereditary diseases)
- Lung cancer
- Brain tumors
- Gynecological tumors (in the Gynecological Cancer Center)
- Skin tumors (in the Skin Tumor Center)

Self-report

The Dresden University Cancer Center (UCC) is one of eleven "top oncological centers" of the Deutsche Krebshilfe e.V. in the federal republic. The UCC obtained this distinction as one of the first top centers in Germany, in 2007, after an international assessment. The Dresden University Cancer Center was founded in 2003, jointly by the University Hospital and the Carl Gustav Carus Medical Faculty, as the Comprehensive Cancer Center for extensive inter-disciplinary care of cancer patients, cancer research and teaching. The UCC has been certified in accordance with DIN EN ISO 9001:2000 since 2004. Highly specialized expert doctors work together in every onco-

- Dr. med. Annette Stein

logical discipline in the Dresden University Cancer Center, in order to provide the best possible, individually tailored, multi-disciplinary treatment for individual patients. Many specialists are not only experienced doctors, but are also active as university lecturers and in cancer research. In this way, it is guaranteed that the most up-to-date knowledge is considered at every step, from diagnosis to treatment. In 2010 the first national branch office of the Cancer Information Service of the German Cancer Research Center in Heidelberg was established at UCC. The UCC is also one of eight partners of the "German Consortium for Translational Cancer Research" which is being sponsored by the Federal Ministry of Education and Research.

Special Offers/Arrangements/Rooms

Inter-disciplinary outpatients and the tumor boards represent important platforms for patient care in the UCC. Inter-disciplinary outpatients offers a central place to go for patients before treatment, between treatment stages and during follow-up, and, as a control center, coordinates diagnosis and treatment, as well as the transitions between care from the referring G.P.'s and hospitalized treatment in the different departments of the University Hospital. Individually recommended treatment is developed in the inter-disciplinary tumor board of the UCC.

Therapeutic spectrum

- Operations for special oncology in individual disciplines
- Chemotherapy (systemic, local)
- Radiation therapy (teletherapy and brachytherapy, stereotaxy), nuclear medicine therapy
- Blood stem cell transplants
- Radiological intervention
- Pediatric oncology
- Psycho-oncological care

Diagnostic spectrum

- Imaging: conventional X-rays, CT, MRI, PET/CT, ultrasound
- Pathology
- Genetics
- Functional diagnosis
